Table of Content

1   Output Device configuration .....3

2   Printing different forms .....4

### 1 Output Device configuration

With the “SPAD” Transaction you can display every available output device within the system. Under those listed devices there are also the devices “JetStamp PDF” and “JetStamp SF / SS” included.

JetStamp PDF	F	PDF1
JetStamp SF/SS	F	SWIN

By double-clicking on a specific device their configuration setup arises. Under the “Access Method” Tab you can assign the Host Printer.

Output Device: JetStamp PDF      Short name: JET2

DeviceAttributes   **Access Method**   Output Attributes   Tray Info

Host Spool Access Method: F: Printing on Front End Computer

**Host printer**: XXX

☐ No Device Selection at Frontend

Select the computer name for the host printer that will be utilizing the Reiner JetStamp Graphic marking device. By using this printer variant, the printer can only be operated through the given computer name in the Host printer field. As an alternative, there is the possibility to set the Reiner JetStamp Graphic marking device as the default printer under the windows printer settings.

The Input for the Host printer field would be: \\“ComputerName”\970

Determine computer name: The Computer name can be found under the following windows system path.

[System Control] → [All System Controls] → [System]

### 2 Printing different forms

In the first step you need to call up the desired application by using the corresponding transaction name. The available applications are “Z\_JETSTAMP\_A”, “Z\_JETSTAMP\_B” and “Z\_JETSTAMP\_C”. Further, details to the listed applications can be found within the trasportobjects documentation.

**Image 1: User Interface application "Z\_JETSTAMP\_A".**

The screenshot shows the user interface for application "Z\_JETSTAMP\_A". It is divided into three sections: "Input", "Form", and "Printer". The "Input" section contains a text field with the placeholder "Please enter your name" and a red rectangular selection box. The "Form" section contains three radio buttons: "SapScript" (selected), "SmartForms", and "PDF". The "Printer" section contains two radio buttons: "Local" (selected) and "SAP".

**Image 2: User Interface application "Z\_JETSTAMP\_B".**

The screenshot shows the user interface for application "Z\_JETSTAMP\_B". It is divided into three sections: "Input", "Form", and "Printer". The "Input" section contains a text field with the placeholder "Please enter your name" and a red rectangular selection box. The "Form" section contains three radio buttons: "SapScript" (selected), "SmartForms", and "PDF". The "Printer" section contains two radio buttons: "Local" (selected) and "SAP".

**Image 3: User Interface application "Z\_JETSTAMP\_C".**

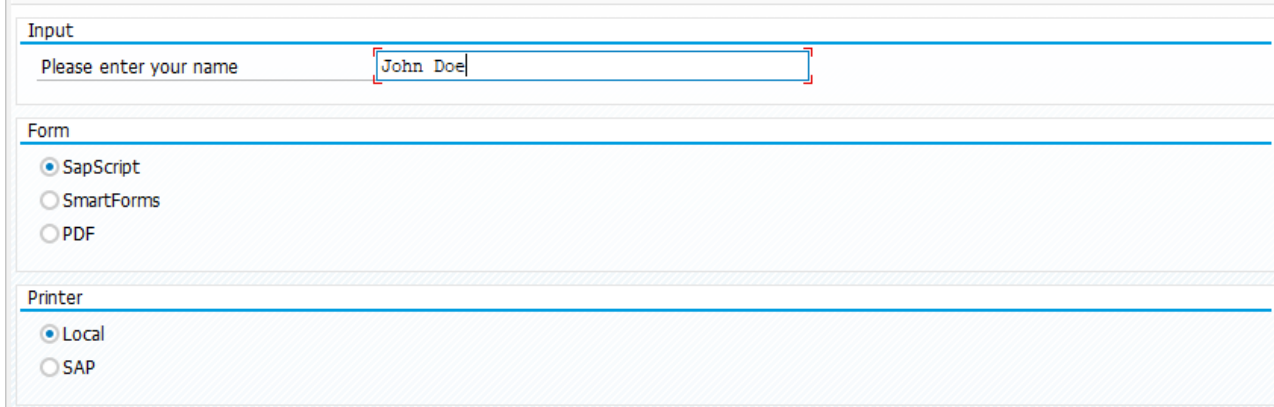

The screenshot shows the user interface for application "Z\_JETSTAMP\_C". It is divided into three sections: "Input", "Form", and "Printer". The "Input" section contains a text field with the placeholder "Production order number" and a red rectangular selection box. The "Form" section contains three radio buttons: "SapScript" (selected), "SmartForms", and "PDF". The "Printer" section contains two radio buttons: "Local" (selected) and "SAP".

## ADVANCED APPLICATIONS

---

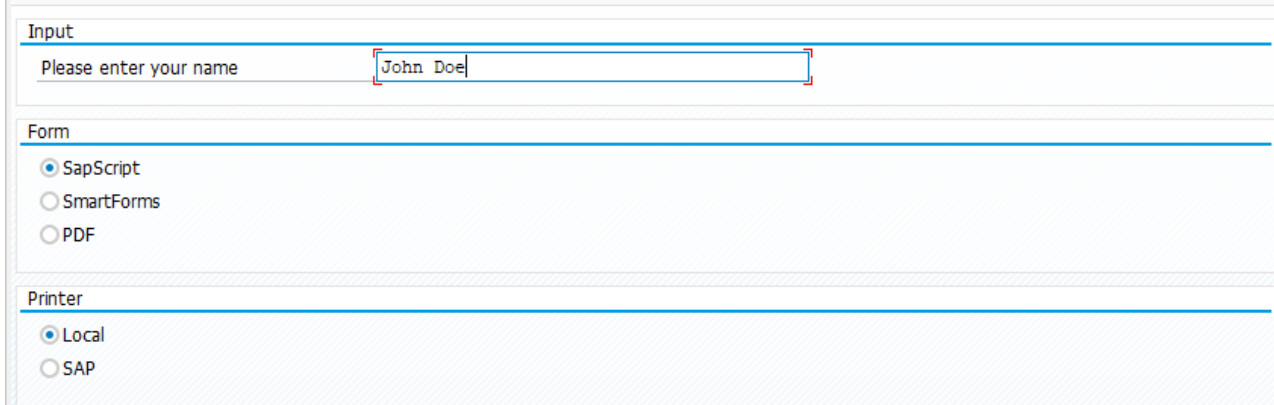

The following step is filling the corresponding fields with appropriate content.

**Image 4: Application "Z\_JETSTAMP\_A" gets filled with the content "John Doe".**

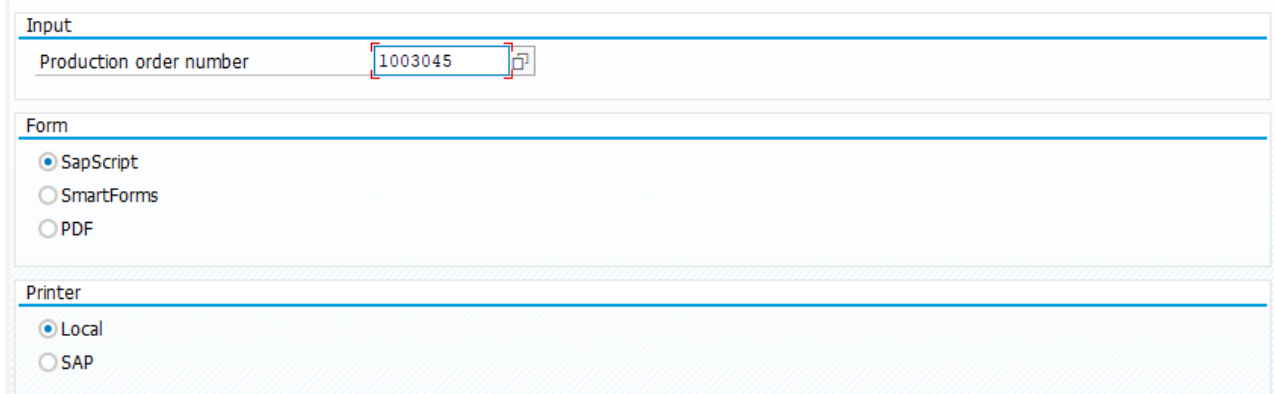

The screenshot shows a web form for application Z\_JETSTAMP\_A. It is divided into three sections: Input, Form, and Printer. The Input section contains a text field labeled 'Please enter your name' with the value 'John Doe' entered. The Form section contains three radio buttons: 'SapScript' (selected), 'SmartForms', and 'PDF'. The Printer section contains two radio buttons: 'Local' (selected) and 'SAP'.

**Abbildung 5: Application "Z\_JETSTAMP\_B" gets filled with the content "John Doe".**

The screenshot shows a web form for application Z\_JETSTAMP\_B. It is divided into three sections: Input, Form, and Printer. The Input section contains a text field labeled 'Please enter your name' with the value 'John Doe' entered. The Form section contains three radio buttons: 'SapScript' (selected), 'SmartForms', and 'PDF'. The Printer section contains two radio buttons: 'Local' (selected) and 'SAP'.

**Abbildung 6: Application "Z\_JETSTAMP\_C" gets filled with the production order "1003045".**

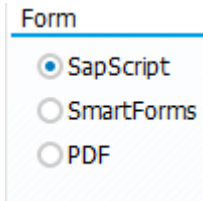

The screenshot shows a web form for application Z\_JETSTAMP\_C. It is divided into three sections: Input, Form, and Printer. The Input section contains a text field labeled 'Production order number' with the value '1003045' entered. The Form section contains three radio buttons: 'SapScript' (selected), 'SmartForms', and 'PDF'. The Printer section contains two radio buttons: 'Local' (selected) and 'SAP'.

## ADVANCED APPLICATIONS

---

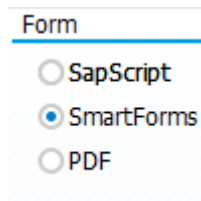

After, fulfilling these steps it's important to select the desired form technology. The selectable options are "Sap Script", "SmartForms" and "PDF".

"PDF" stands for the "Adobe Interactive Forms" technology.

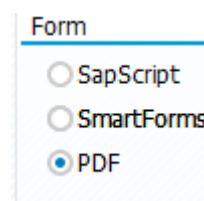

A screenshot of a 'Form' selection dialog box. It has a title bar 'Form' and three radio button options: 'SapScript' (selected), 'SmartForms', and 'PDF'.

**SAPScript selection**

A screenshot of a 'Form' selection dialog box. It has a title bar 'Form' and three radio button options: 'SapScript', 'SmartForms' (selected), and 'PDF'.

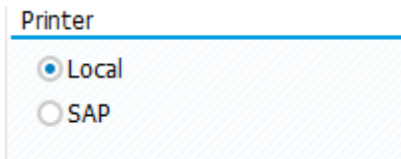

**SmartForms selection**

A screenshot of a 'Form' selection dialog box. It has a title bar 'Form' and three radio button options: 'SapScript', 'SmartForms', and 'PDF' (selected).

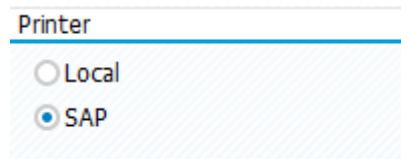

**PDF selection**

The last step is defining the printer variant. Up for selection are the variants „Local“ and „SAP“. Further information about the printing variants can be looked up under the transport objects documentation.

A screenshot of a 'Printer' selection dialog box. It has a title bar 'Printer' and two radio button options: 'Local' (selected) and 'SAP'.

**Local Selection**

A screenshot of a 'Printer' selection dialog box. It has a title bar 'Printer' and two radio button options: 'Local' and 'SAP' (selected).

**SAP Selection**

After completing all necessary steps, the application is ready to create an application corresponding printer job.

To run the application you can either press the F8 button on the keyboard or click on the small watch icon on the top of the application bar.

Symbolizing the run button in the corresponding application. Runs immediately the print job.
